

IoT Lab 2 : Co2 measurement with ESP32

Hanane.meliani@centralesupelec.fr

Material

ESP32 dev module <https://joy-it.net/en/products/SBC-NodeMCU-ESP32>

OR : TTGO-T1 : <https://www.espboards.dev/esp32/ttgo-t1/>

Sensair S8 sensor <https://senseair.com/product/s8/>

Leds + wires +100ohms resistors

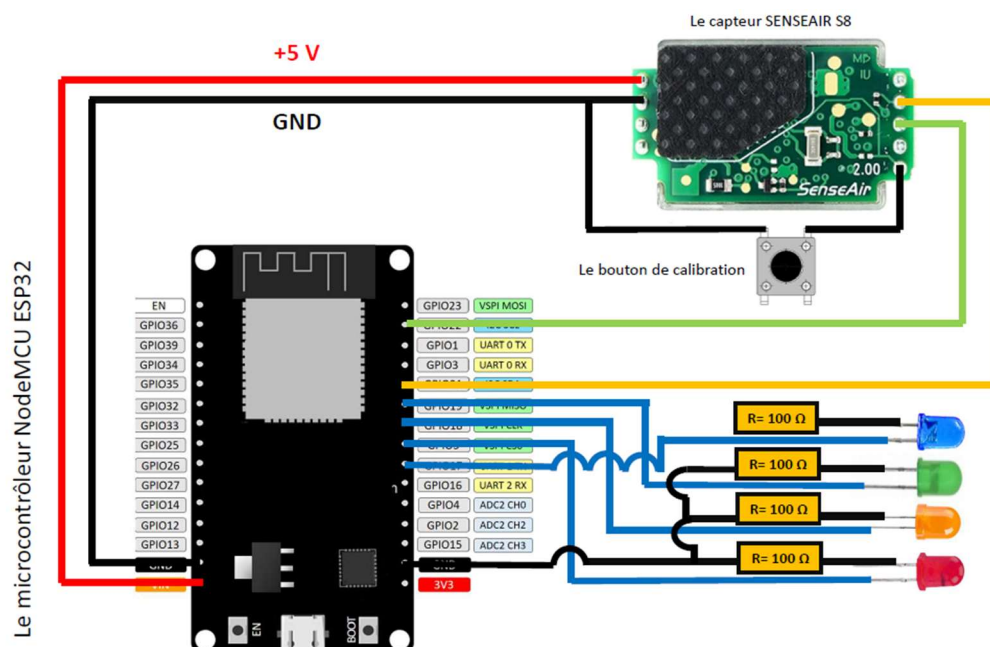

Figure 1 : Using esp32 devmodule

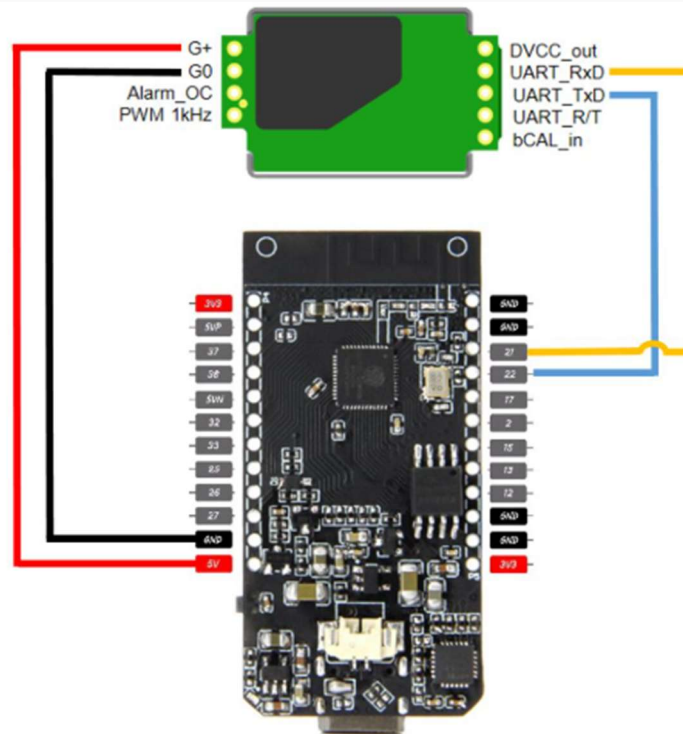

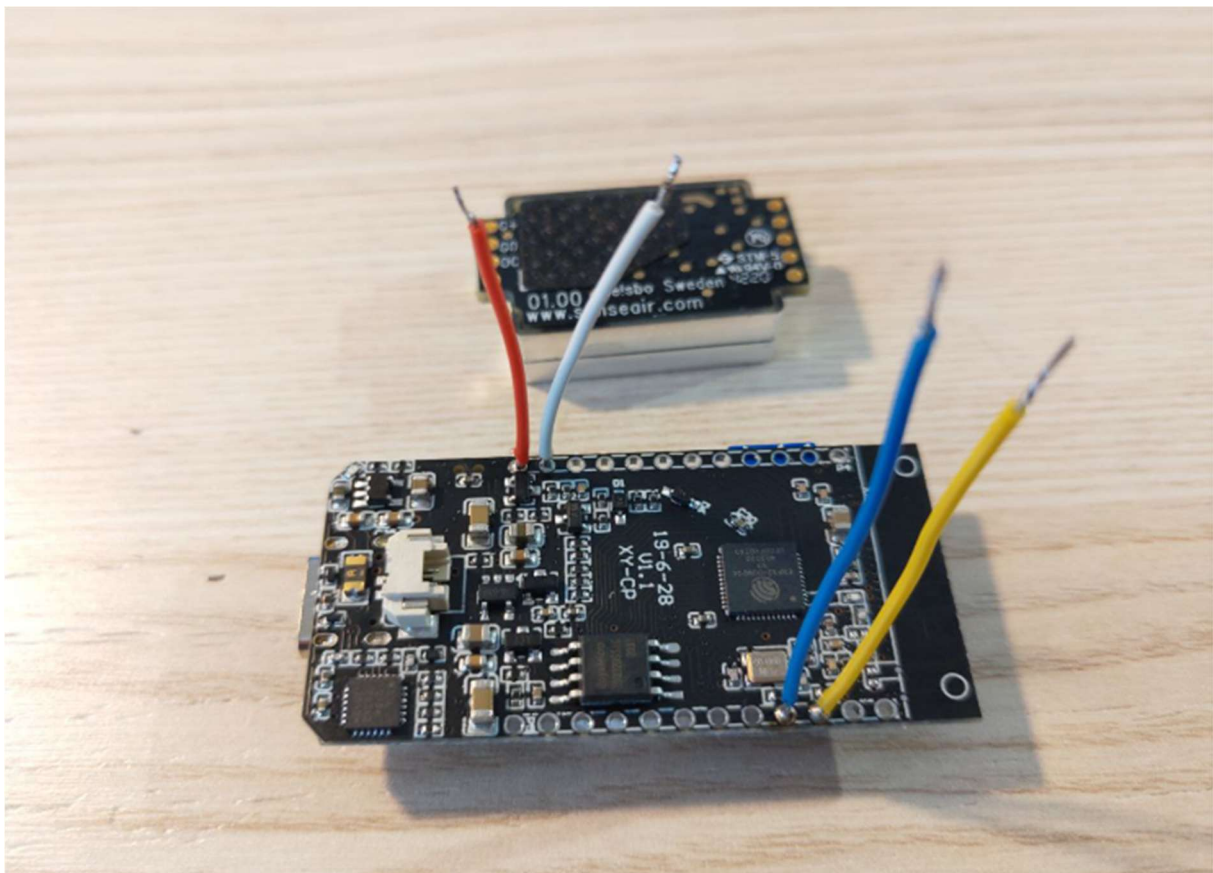

Figure 2 : using TTGO

This project was developed in the project <https://letsair.org/>
